Other bicycle information for World Trade Center tenants

- Always lock your bicycle when leaving it unattended, no matter the location.
- **Use a “U” or handcuff-type lock.** These are not easily compromised and deter thieves for a reason. Note that some earlier edition Kryptonite brand locks can be defeated by a Bic pen. If you have an older Kryptonite lock, check online whether it will stand up to the test of securing your bike.
- **Secure your wheels with your lock if you can.** Having quick release wheels is great for fixing a flat on the road but also makes it easy for thieves to get them. Secure your wheels with your lock. If you can only lock one, the rear wheel is more expensive to replace.
